Curriculum Vitae - George Kim

Professional Experience

Backend Developer at Data Solutions (2017-2022)

Designed and optimized backend architectures for data-intensive applications using Python and Django. Developed and maintained MySQL databases, implemented caching mechanisms for faster data retrieval, and automated data processing workflows. Worked closely with data science teams to create pipelines for data analytics.

Junior Software Engineer at Tech Gear (2015-2017)

Assisted in developing backend services for web applications, contributed to database design and data migration projects, and implemented scheduled tasks for data updates.

Education

Diploma in Computer Science - National Technical University (2017)

Certifications

CompTIA Security+

Cisco Certified DevNet Associate

Technical Skills

Python, MySQL, Django, API Development

Projects

Designed a secure authentication system

Developed data pipelines for analytics
